

CICERO AVENUE CORRIDOR STUDY

The Southwest Conference of Mayors is leading a project – the Cicero Avenue Corridor Study – to develop a transportation and economic development plan for the stretch of Cicero Avenue from 55th Street on the north to I-294 on the south. The Corridor intersects the following communities: Bedford Park, Burbank, Chicago, Hometown, Oak Lawn and Alsip. The project is being conducted in coordination with the RTA, IDOT, Pace, Metra, CTA, Illinois Tollway, and CMAP.

The project goal is to develop a comprehensive corridor plan that unites the Corridor, its activities and character to make it a more highly-functioning transportation corridor and activity center for the southwest suburbs. This planning project is designed to complement and enhance – not supersede or replace – the existing plans of corridor communities.

There will be several opportunities throughout the project for you to provide input to the planning process. We will present the findings from this project periodically throughout the corridor.

Learn more about the project, join the mailing list, comment, or take a survey at the project website: www.CiceroCorridor.com

Your input is valuable in making this plan successful!
